# Landing Page Ownership Transfer

***Your landing page is ready to go live on your domain. Here's all you need to do.***

---

## Step 1 — Confirm payment

Complete the one-time transfer fee here: Pay now →

Once payment is confirmed, we'll get everything set up on our end — usually same day.

**You already own this page permanently.** The one-time fee covers the full transfer. No strings attached. As long as we're working together on your campaigns, all edits and updates to this page are included — you won't be charged anything extra.

---

## Step 2 — Add a DNS record (5 minutes)

This connects a subdomain of your choice to your page — for example `join.yourdomain.com`, `apply.yourdomain.com`, or any keyword you like.

Log into wherever you registered your domain — usually GoDaddy, Namecheap, Cloudflare, or a similar registrar. Once logged in, look for **DNS Settings** or **DNS Management** under your domain. Add the following record:

| Type | Name / Host | Value / Target | TTL |
|---|---|---|---|
| CNAME | `join` *(or your chosen keyword)* | `cname.vercel-dns.com` | Auto |

**The Name / Host field** is the subdomain prefix — the word that appears before your domain. You can use anything: `join`, `apply`, `start`, `get`, etc. Just let us know what you chose so we can match it on our end.

Once added, your page will go live within a few minutes. No further action needed on your end — we handle the rest.

**Not sure where to find DNS settings?** Just tell us who your domain registrar is and we'll send you a step-by-step screenshot guide for that specific platform.

---

## Later — complete the handover (not immediately required)

These two steps move the page fully onto your own accounts so it runs independently — no dependency on us whatsoever. Do these at your own pace, whenever is convenient.

**A — Create a free Vercel account and add us**

Vercel is the platform that hosts your page. It's free.

1. Sign up at vercel.com
2. Once you're in, go directly to your team members page: vercel.com/account/members
3. Click **Invite** and add owner@bleedai.com
4. Let us know — we'll complete the transfer from there

**B — Create a free GitHub account and add us**

GitHub stores the source code for your page. Also free.

1. Sign up at github.com
2. Verify your email when prompted
3. Reply to this email with your GitHub username
4. We'll share the full source code repository with you directly

---

> **Optional: Monthly Support Plan ($39/month)** After your campaign wraps up, this plan keeps everything running smoothly — priority updates, up to 3 changes per month with 24-hour turnaround, and heavily discounted rates on any new landing pages. Cancel any time.

---

*Questions at any point? Email us at owner@bleedai.com — we're usually back within a few hours.*
